Parth Pandey

Associate Software Engineer — Full Stack & GenAI Developer
Bangalore, India | parthbuilds@gmail.com | +91 8005838132 | linkedin.com/in/parth-builds | github.com/parthbuilds

PROFESSIONAL SUMMARY

Results-driven Associate Software Engineer and Full Stack Developer with 1+ years of hands-on experience building production-grade SaaS platforms, microservices, and GenAI-powered automation workflows. Proven expertise in architecting scalable backend systems using Python, FastAPI, and Node.js, alongside optimized PostgreSQL databases and vector search integration. Demonstrated success in reducing processing times by 40

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript (Node.js), SQL, Bash
- **AI & GenAI Frameworks:** LangChain, OpenAI API, Large Language Models (LLMs), RAG Pipelines, Prompt Engineering, PyTorch, Hugging Face
- **Backend & Architecture:** FastAPI, Express.js, REST APIs, Microservices, WebSockets, Event-Driven Architecture, Automation Workflows
- **Databases & Caching:** PostgreSQL, pgvector, Redis, TimescaleDB, MongoDB, MySQL
- **DevOps & Infrastructure:** Docker, Docker Compose, GitHub Actions, CI/CD Pipelines, AWS, Vercel, Nginx, Keycloak (SSO/RBAC)
- **Testing & Quality Assurance:** pytest, Postman API Testing, AI-Assisted Debugging, Unit Integration Testing, Defect Resolution

PROFESSIONAL EXPERIENCE

Datavedam Bangalore, India
Founding Engineer / Associate Software Developer *Nov 2025 – Present*

- Architected and deployed 5 production-grade SaaS platforms and microservices serving 500+ active users using FastAPI, Python, and PostgreSQL.
- Engineered advanced Retrieval-Augmented Generation (RAG) pipelines and automated document processing systems, cutting manual processing times significantly.
- Orchestrated containerized deployments with Docker Compose and automated comprehensive CI/CD pipelines via GitHub Actions, achieving 80

Route to Market Bangalore, India
Full Stack Developer *Jan 2025 – Sept 2025*

- Developed and scaled high-performance web applications using React.js, Node.js, AWS cloud services, and Vercel, maintaining 99.9
- Engineered automated backend workflows using Express.js and Python, eliminating repetitive manual operations and accelerating workflow execution cycles by 35
- Streamlined deployment reliability by implementing robust GitHub Actions CI/CD pipelines, successfully reducing production downtime and resolving system defects.

PROJECT EXPERIENCE

- **Shiksha Vedam - AI-First School ERP (Datavedam):** Developed robust RAG pipelines and automated workflows powering multi-agent school administrative tools, parent/student portals, and advanced OCR grading engines. Containerized backend services with Docker, Nginx reverse proxy, and PostgreSQL databases.
  Tech Stack: Python, FastAPI, LangChain, pgvector, Keycloak, Docker, PostgreSQL, Node.js
- **PracharVedam - Ad Analytics Platform (Datavedam):** Built modern web frontend interfaces and scalable backend microservices for automated ad analytics. Integrated event-driven workflows with TimescaleDB, Redis, and real-time tracking metrics dashboards.
  Tech Stack: Python, FastAPI, PostgreSQL, TimescaleDB, Redis, Docker, Nginx, GitHub Actions, React
- **Workflow Automation Platform (n8n + AI):** Designed and implemented sophisticated automation workflows to streamline document processing and task execution pipelines. Integrated advanced AI-based parsing and response generation using LangChain and LLM APIs.
  Tech Stack: Python, n8n, LangChain, OpenAI API, Node.js
- **Event Management Dashboard & AI Voice Agents:** Developed a responsive real-time operational dashboard supporting concurrent users alongside voice agent integration for automated status tracking, intelligent notifications, and seamless interaction handling.
  Tech Stack: Python, React.js, Node.js, WebSockets, OpenAI API, Tailwind CSS

EDUCATION

Poornima College of Engineering Jaipur
Bachelor of Technology in Computer Engineering *2020 – 2024*
