Parth Pandey

Bengaluru, India | +91 8005838132 | parthbuilds@gmail.com | linkedin.com/in/parth-builds | github.com/parthbuilds

Professional Summary

Founding engineer and full-stack AI developer with hands-on experience architecting production-grade SaaS platforms, autonomous agentic workflows, and high-throughput microservices. Core contributor at DataVedam Edge, driving AI-first product engineering across backend architectures, RAG pipelines, and multi-agent systems. Proven background advising early-stage ventures and enterprise clients on technical scalability, AI automation pipelines, and modern cloud architectures using Python, FastAPI, Node.js, and PostgreSQL.

Skills

AI & Agentic Engineering: GenAI, Agentic Workflows, Retrieval-Augmented Generation (RAG), Context Engineering, Prompt Engineering, LLM Application Architecture, LangChain, OpenAI API, Hugging Face, PyTorch
Web & Application Stack: Python, FastAPI, Node.js, Express.js, React.js, JavaScript, TypeScript, REST APIs, Microservices, WebSockets, Event-Driven Architecture
Platforms, Data & Infrastructure: PostgreSQL, pgvector, TimescaleDB, Redis, MongoDB, MySQL, Docker, Docker Compose, CI/CD (GitHub Actions), Nginx, AWS, Vercel, Keycloak (IAM/SSO/RBAC)
Quality & Engineering Practices: pytest, Postman API Testing, AI-Assisted Debugging, Unit & Integration Testing, Defect Resolution, System Design, Solution Architecture

Work History

FOUNDING ENGINEER / ASSOCIATE SOFTWARE DEVELOPER Mar 2026 – Present
DataVedam Edge *Bengaluru, India*

- Co-architected and shipped 5 production-grade SaaS platforms and microservices serving 500+ active users with 99.9% operational reliability using FastAPI, Python, and PostgreSQL.
- Engineered advanced RAG pipelines, vector search infrastructure using pgvector, and automated multi-modal document processing systems, reducing manual processing turnarounds by 40%.
- Designed event-driven data pipelines and analytics engines integrated with TimescaleDB and Redis for real-time tracking dashboards.
- Implemented containerized microservice deployments with Docker Compose and automated end-to-end CI/CD pipelines via GitHub Actions, accelerating release cycles by 85%.
- Managed enterprise authentication and role-based access control (RBAC) across applications using Keycloak.
- **Key skills:** Agentic Systems, GenAI, RAG, Python, FastAPI, Node.js, PostgreSQL, pgvector, TimescaleDB, Redis, Docker, GitHub Actions, Keycloak, Microservices.

INDEPENDENT TECHNICAL CONSULTANT Oct 2025 – Feb 2026
AI Solutions & Full-Stack Architecture *Bengaluru, India / Remote*

- Partnered with early-stage founders and tech teams to architect and deliver zero-to-one MVPs, LLM integrations, and scalable full-stack system architectures.
- Designed and deployed customized workflow automation engines and RAG pipelines using Python, LangChain, and n8n, eliminating manual data entry bottlenecks for enterprise clients.
- Conducted technical architecture audits, database query optimizations, and containerization strategies for client codebases, reducing cloud operating overhead and improving API latency.
- Integrated production-ready authentication, role-based access control, and asynchronous microservices to prepare client applications for commercial pilot readiness.
- **Key skills:** Solution Architecture, Technical Consulting, RAG Systems, FastAPI, Node.js, Docker, Workflow Automation, MVP Engineering.

FULL STACK DEVELOPER Jan 2025 – Sep 2025
Route to Market *Bengaluru, India*

- Built and scaled high-performance web applications using React.js, Node.js, AWS cloud services, and Vercel while maintaining 99.9% application uptime.
- Engineered automated backend workflows and data handling services using Express.js and Python, reducing manual operations and speeding up task execution cycles by 35%.
- Streamlined deployment reliability by standardizing GitHub Actions CI/CD pipelines, significantly decreasing production defects and eliminating deployment downtime.
- **Key skills:** React.js, Node.js, Express.js, Python, AWS, Vercel, GitHub Actions, REST APIs, CI/CD, Frontend Optimization.

Selected Builder Work & Projects

ShikshaVedam (DataVedam Edge): AI-first school ERP platform featuring RAG pipelines, parent/student portals, and automated OCR grading engines. Built with FastAPI, LangChain, pgvector, Keycloak, Docker, and PostgreSQL.

PracharVedam (DataVedam Edge): Agentic ad analytics and marketing platform featuring real-time tracking dashboards and automated campaign intelligence. Built with FastAPI, React, PostgreSQL, TimescaleDB, Redis, and Nginx.

Workflow Automation Platform (n8n + AI): Enterprise workflow automation engine orchestrating complex document extraction and agentic task execution using LangChain and LLM APIs.

Real-Time Event Management & Voice Agents: Operational dashboard supporting concurrent real-time connections via WebSockets, paired with OpenAI-powered conversational voice agents for status reporting.

Education & Credentials

Poornima College of Engineering — Jaipur, India
Bachelor of Technology (B.Tech) in Computer Engineering — 2020 – 2024
